

CROSSFIELD CHRONICLE

VOL. XXIII. No. 15

CROSSFIELD, ALBERTA, APRIL 24th., 1930

PRICE 1.50 A YEAR

The entire organization of the International Harvester Company in the three Western Provinces during the next three weeks is being devoted to the sale and demonstration of McCormick-Deering Cream Separators.

We know we have the easiest running separator on the market and we guarantee its work. If you have an old, out-of-date Cream Separator, don't waste your time and cream with it—your loss will soon pay for a McCormick Deering.

Come in and see them on the floor—try them out and we'll convince you that you cannot do without one if you milk from one to fifty cows.

Board of Trade Has Most Interesting Session

The regular meeting and luncheon of the Board of Trade was held in the Oliver Hotel on Monday evening April 21st, with 45 members present.

After dinner president Laut called on Mr. E. S. McKory, Western Manager of the U.G.G. of Calgary, and also a member of the Calgary Board of Trade, to address the meeting.

Mr. McKory took for his subject the Growing and Marketing of Wheat, and he pointed out that the Canadian farmer would have to expect a lower price for his wheat in the future as general conditions the world over showed that there was more wheat being grown by other Nations, he also stated that the 1928-29 crop partly caused the slump in the price of wheat during the past six months.

The second speaker called on was Mr. R. M. McCool, M.L.A., who gave a very able address on the Natural Resources. He divided his subject into two parts; first — "What Right has Alberta to ask for her Natural Resources?" and secondly — "What Benefit would it be to the Province?" In his address he went back to Confederation 1867 and dealt with it up to the present time and concluded by showing the many benefits which the Province of Alberta will derive when taking over these resources from the Federal Government. Mr. McCool stated that final arrangements for the transfer of the resources from the Dominion Government to the Province would be concluded in May.

We are unable through lack of space to give a full report of these two most interesting addresses.

At the conclusion of the above address the business part of the meeting was dealt with.

The president called for the report of the Sign Committee and Ed. Meyers stated that the sign would be completed and erected on the site given by permission of Directors of the Crossfield Co-operative U.F.A. this week.

The next report given was that of the Parks Committee by Mr. A. A. Halliday, who spoke on the necessity of raising funds for play-grounds equipment for the children. After many suggestions made by the different members, Mr. Halliday passed around a list for subscriptions to start the fund and in a few minutes had \$111.00 subscribed and there should be little difficulty in getting the balance required from the citizens to put in the park the necessary play-ground equipment.

Mayor Williams spoke on the bad condition of the trees in the park. It was decided that the members of the Board of Trade meet at the Park on Arbor Day and cultivate the land around the trees.

Mr. Geo. Huser brought to the attention of the meeting the deplorable condition and location of the nuisance grounds, and he stated that it was a poor advertisement for the town, and considered that immediate action be taken for the removal of same by the Village Council.

Mayor Williams stated that land suitable for a nuisance grounds was available about a mile west of town and had been looked over by the Government Inspector. He had favored such a move for sometime.

It was moved by Mr. R. M. McCool and carried unanimously that the Council be notified to take immediate action in the matter.

A letter from the Alberta Motor Association asking for a donation of \$10.00 toward the making of a

POLICE COURT NEWS

L. D. Mallock of Airdrie, appeared before Ivor Lewis, police magistrate at Crossfield on April 17th, and pleaded guilty to a charge of trailing stock a distance of twenty miles or over without a permit, contrary to the Stock Inspection Act. Fined \$10.00 and costs. Information laid by Constable Elvin of the A. P. P., Calgary.

Jas. A. MacDonald was arrested by Constable Jarman of the A. P. P. on April 19 at Airdrie, while wearing a suit of clothes stolen from Roy McFarlane of Airdrie on April 4th. MacDonald appeared before Ivor Lewis, police magistrate at Crossfield on April 19th, charged with theft of clothes and other articles. Pleading guilty and sentenced to three months hard labor at Fort Saskatchewan. MacDonald also pleaded guilty to the theft of 61 bushels of oats on March 28 from Milo Martinusen of Airdrie, was given another three month hard labor term; sentences to run concurrently.

Play-ground Equipment Fund Away to a Good Start

\$111.00 was subscribed to the play-ground fund by members of the Board of Trade at their meeting on Monday night.

The purpose of this fund is to buy and install in the park certain play-ground equipment for use of the children of Crossfield and district.

Catering To Tourists

Approximately twenty millions of dollars will be expended by the Governments of the three Canadian prairie provinces in the construction and maintenance of good roads this year, not to mention several more millions which municipalities will devote to other roads not included in the system of through Provincial highways and main market roads. It is a lot of money. It represents the largest single item of expenditure for any one service. It means an outlay of at least ten dollars for every man, woman and child in Western Canada.

A very considerable portion of this vast sum is being expended on the assumption that, quite apart from the benefits that will directly accrue to our own people by reason of these good roads, they will be the means of attracting an ever increasing volume of tourist traffic from other Provinces and the States to the south, and that these visitors will bring much money and profit to our people through the purchases and expenditures they will make in this country. In a word, the avowed object of a goodly portion of this expenditure is to encourage visitors to tour the West.

Good roads, admittedly, are essential if we are to develop a large tourist business. But, in themselves, they are not enough. These prospective tourists can find good roads, possibly better ones than we can offer, much nearer home. If a fine highway leads to a place where they can find comfort and safety it is all they are looking for. They will come to Western Canada to enjoy a new, a virgin land. They come expecting something different. What is Western Canada going to provide?

Are we going to allow our highways to be disfigured—as they have been south of the international boundary line—by unsightly billboards and advertising devices of various kinds, defacing the landscape, obscuring the scenic beauties our country has to offer, sometimes confused by drivers with the legitimate road directions, signs, and an eyesore to all? Governments and municipalities can, to a large extent, control the placing of such signs on the highway right-of-way, but individual property owners must co-operate by refusing permission for the erection of billboards and the plastering of signs on private property and buildings.

Our cities, towns and villages should seek to make their respective communities attractive to the visitor, and special attention should be devoted to the approaches to the main roads leading into and out of each settlement. The smaller the place, the more important it is that the surroundings be right, because they are noted to a greater extent by visitors than is the case in larger centres.

Community spirit and enterprise should find expression in having all places in which visitors are interested, and must visit, as, for example, hotels, cafes, garages, post offices, as clean, neat and efficient as possible. Gasoline and oil companies are setting a good example in making filling stations attractive in appearance, especially in larger centres, with rest rooms, wash rooms, comfort stations, etc. They are out to give service. Other businesses may well emulate them. Even the smallest place on a through highway can support such services.

The main highways through towns and villages should be clearly marked, and the location of such utilities as the post office, the telephone exchange, telegraph office and camp, prominently indicated. Above all, courtesy should be the watchword of every citizen. It should be remembered that they are strangers who are entertaining in your midst. What to you is commonplace, is to them strange and new. They desire information; then go out of your way to supply it. Make them realize how welcome they are so that, when they depart, if they carry away no other impression, they will at least remember your town as one where the people were cordial, kind and helpful.

The millions of dollars that are being expended on highways is your money. Its expenditure is designed to benefit you and your community directly and indirectly. Make the most of it. This you can only do by individual and community co-operation.

A Modern Fog Alarm

Partridge Island Signal Derives Power From Diesel Engines

The Partridge Island light and fog signal station at the entrance to St. John's, N.B., harbor, said to be the first steam-operated fog alarm in the world, will in the near future derive its power from modern semi-Diesel engines. In adopting this modern power the station may again lay claim to priority for it will be the first of the kind in Canada. Other stations depending on oil engines have only internal combustion motors utilizing gasoline as a starting mixture and operating on kerosene as a regular fuel. The light on Partridge Island was established in 1791, and the fog signal in 1859.

Shipments From Peace River

During the calendar year 1929, the Peace River territory shipped to Edmonton, 5,350 cattle, 25,160 hogs, 1,445 sheep and 789 horses, besides sundry other products, including sacked seed. Nearly 11,000 head of cattle were shipped in the last two years and over 100,000 acres were broken during 1929.

Strikes In Canada Decrease

With One Exception Last Year Most Peaceful Since 1902

With one exception, 1929 was the most peaceful year in Canadian labor since 1902, the number of workers affected by strikes and lockouts falling to 12,924, and the days lost to 153,936. Steady progress toward happier relations between employer and employee has been registered now since 1922, the number of workers affected being as follows: 1922, 41,050; 1923, 32,868; 1924, 32,494; 1925, 25,790; 1926, 24,142; 1927, 22,685; 1928, 18,238; 1929, 12,924.

The figure for last year was only nine per cent. of the 1919 total, the year of the Winnipeg strike. Toronto figured in three of the minor strikes of the year. The plasterers' strike involved 600 workers, and lasted 35 days, the time loss being 7,500 working days. The plumbers' strike involved 400 workers, lasted 19 days, the time loss being 7,500 days. The plasterers' strike involved 500 workers, for 12 days, causing 6,000 days' time loss.

ST. VITUS DANCE

SUFFERER MADE WELL

Nerves Strengthened Through the Use Of Dr. Williams' Pink Pills

Time after time cases are brought to the notice of the public where sufferers from nervous troubles have been relieved by Dr. Williams' Pink Pills—where victims of St. Vitus Dance have been made well through the use of these pills after other medicines have failed to be of benefit. The reason for this is that Dr. Williams' Pink Pills act directly upon the blood—they make new, rich red blood and in thus banishing all impurities from the blood strengthen the nerves and make St. Vitus Dance impossible.

Mrs. P. Donnelly, Montreal, Que., is a most grateful mother who wishes to add her testimony to those already published. She says:—"My little girl, aged eleven, was a great sufferer from St. Vitus Dance. Several doctors prescribed for her without benefit. She was in the hospital for two weeks—still no benefit. I then saw an advertisement recommending Dr. Williams' Pink Pills. St. Vitus Dance, so decided to try them. My little girl had only taken a couple of boxes when I noticed some improvement so I continued with the treatment till now she is completely free from the trouble and can enjoy herself as other children do. I can highly recommend Dr. Williams' Pink Pills to anyone suffering from St. Vitus Dance or any other form of nervous trouble, for what these Pills have done for my daughter I am sure they will do for others."

Dr. Williams' Pink Pills are sold by all dealers in medicine or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Needs Assistance Of Engineers

To Secure the Best Social and Economical Development In Canada

"We went westward and now we are going northward," said Brigadier-General Charles Hamilton Mitchell, describing the development of Canada to the American Society of Mechanical Engineers, at Washington. General Mitchell made plain the results of improvement in transportation, in development of hydro-electric energy, among the people of the Dominion.

The general informed the assembled international engineers of the importance to Canada of the development of transportation by land, water and air, of the tremendous result of the mechanization of the agricultural industry, of the "miracle of paper," and the extraordinary mining development.

"Looking to the future," he concluded, "a young country such as Canada with its huge natural resources, will still more demand the fullest assistance and contribution from its engineers to secure the best economical and social development. When that best is obtained then the best political and cultural results will be assured."

He had spoken to her on the pier and she was very annoyed.

"I don't know you from Adam!" she exclaimed, indignantly.

"You ought to," he retorted. "I'm dressed differently."

In spite of all jokes, figures prove that Englishmen are more saving than Scots.

The early bird gets the worm, but unfortunately, the too early bird gets the frost.

Dry, Burning Throat Made Life Miserable

Have You These Symptoms?

"For three years I was seriously bothered by a bronchial cough. At night I would awaken with a dry, irritating feeling in my throat. I could not sleep, and I was very soon my throat got into quite an inflamed condition. Once I got CATARRHOZONE HOZONE INHALER I was all right. I took it to bed, and if an attack awakened me the inhaler gave me relief. Catarrhozone has restored me and I strongly urge every one with a weak throat to use it regularly."—(Signed) J. E. Bauser, Reading.

Catarrhozone will not disappoint you. Get the complete \$1.00 outfit; it's guaranteed. Small size, 50c. At dealers everywhere.

Loss Is Unnecessary

All Baby Chicks Can Be Raised If Properly Looked After

"There is no sense in the idea so many people have, that you have to figure on losing a big percentage of your baby chicks," says P. F. Clardy, former president of the American Baby Chick Producers' Association, and for thirty-five years a practical poultry raiser. "Start with good vigorous chicks from healthy stock, properly hatched in modern incubators. Give them the right kind of care and feed, protect them from chilly winds and rains and from vermin and rodents, and there is no reason why you should not raise practically every baby chick."

"In all my years of experience, I have found that, aside from the very important factor of starting with a quality of chick in the first place, the most important thing in poultry raising is to give the birds the care they are entitled to. A baby chick is a tiny bit of life, but how it will grow when it gets a good start!"

"I have found that strict attention to keeping the living quarters of poultry absolutely clean is a great help. Fifth spread disease! Cleanliness keeps it off. Of course undue exposure must be guarded against also."

"So long as the Chinese doctor keeps his patients well, the story says, he gets his pay regularly. Whenever they become ill, his pay stops until he makes them well again. Consider yourself your own poultry doctor. So long as your birds are well and thrifty they will pay you; consequently, it is up to your interest to keep them well all the time."

Smothering Spells

Couldn't Walk Far Gassed For Breath

Mrs. T. W. Roth, Kelowna, B.C., writes:—"For over a year I was troubled with smothering spells, and it was impossible for me to go any distance on account of having to gasp for breath."

"A friend told me to try

which I did, and in a short time I felt much better.

"I can now recommend them to everyone."

Price, 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Synthetic Bee Stings Perfection of synthetic bee stings has been announced by the medical authorities of Vienna. Austria. Professors of the Polytechnic hospital made chemical analysis of bee venom and claim to have succeeded in duplicating and improving it. The stinging chemical is said to cure rheumatism.

Persian Balm is a true elixir of youth. Refreshes and rejuvenates. Adds a youthful charm to the complexion. Softens and beautifies the skin. Makes hands flawlessly white. A Model Community

In the town of New Lanark, Scotland, established as a model community by Robert Owen, there were no lawyers or magistrates and no legal punishment during a period of nearly 30 years.

Minard's has Wonderful Antiseptic Power

Not Properly Qualified

Toronto Professor Says Universities Not Equipped To Study International Relations

Canadian universities are not sufficiently qualified for an adequate study of international law and international relations, Prof. Norman MacKenzie, of the University of Toronto, told the House of Commons committee on industrial and international relations. He knew of no university in Canada, he said, which had a library equipped for the intensive pursuit of these studies.

The committee was considering a resolution sponsored by Miss Agnes MacPhail (Prog. South-east Grey), calling for the establishment of chairs and scholarships of international relations in Canadian universities. There was a field in Canada for improvement in this respect.

Prof. MacKenzie thought parliament might well consider adding either by grants or other means. If the libraries were available Professor MacKenzie thought, the student would be developed by the universities and the students themselves. Another suggestion he advanced was that competent professors and students in Canadian universities be given greater opportunities to observe the operations of international business.

Many mothers can testify to the virtue of Mother Graves' Worm Expeller, because they know from experience how useful it is.

Preserving Historic Building

Alberta May Restore Old Fur House Built In 1798

Old Fort Edmonton, built 135 years ago inside an 18-foot stockade, may see partial restoration, according to the statement of Premier Brownlee in the Alberta legislature. The last building to be pulled down was the old fur-house, which until 1915, stood on the ground below the legislature. The proposal seems at present concerned only with setting up a log structure to store goods, identical with this fur-house, which goes back to the time when John Rowland was chief factor, between 1826 and 1854. Interest is being shown in the possible erection of a new building to replace the old one.

Minard's For Falling Hair

Thermometers Tested Yearly Every year, the Physical Testing Laboratory of the Topographical Survey, Department of the Interior, tests several thousand clinical thermometers for Government departments or for the general public. A certificate is given with each thermometer, which successfully passes the required tests.

Dogs Have Rights

Because he drove his car over a Boston building, Robert Miller, of Hamilton, Ont., was found guilty of cruelty to animals. He was allowed out on suspended sentence, but must make good the value of the deceased animal, while he pays \$60. Magistrate Burdette ruled that dogs are entitled to the same consideration on the street as pedestrians.

Recreational Resources of Canada Compose a Loadstone Which Draws Millions of Visitors

Canada's recreational resources are a national asset of the first order. They compose the loadstone which each year draws millions of visitors to the Dominion and they form a source of wealth which annually adds a large and rapidly growing item to the national income. There are, in fact, few records in the annals of Canadian development more interesting or more remarkable than that of the rise to importance of the Dominion's recreational features. Today the returns from these assets keep pace with those from such major factors as mines and forests.

Some idea of the extraordinary growth of holiday traffic may be gained from the records of touring automobiles entering Canada in recent years. In 1919 the number of cars entering Canada for touring purposes was 238,000 and during the ten years up to 1929 this figure had increased to 4,508,000. Aside from the phenomenal increase of motor tourists, railway and steamship lines each year add large numbers to the thousands who holiday in Canada. Tapping an even wider field than the automobile, these organizations have spread the Dominion's fame as a holiday land literally throughout the world.

The most casual traveller crossing the Dominion from east to west cannot but be struck by the sheer diversity of Canada's natural features. First there is the rugged Atlantic shore; then the great system of inland lakes, seas in depth and size; next a thousand miles of rolling prairie; followed by the great barrier of the Rockies, rivaling the Alps in grandeur; and finally the sea, bathing with its warm waters the far flung Pacific coast. All these contribute to the glorious panorama of a transcontinental trip across Canadian territory.

The charms of the Maritime Provinces are not easily depicted. These provinces—Nova Scotia, Prince Edward Island, and New Brunswick—are famed for the mellowness of age that captivates the visitor from newer regions. The snow-white lighthouses crowning the cliffs that overlook the sea, the white sail of the fishing smack seeking its sheltering cove, the quaint fishermen's cottages that straggle up the hillside, the shaded inland roads and winding forests, the springtime mantle of blossom that clothes mile upon mile of orchard valleys—all these suggest the elements that blend to give the Maritimes a picturesque popularity of their own. In this setting is found all that goes to complete the happiness of the holiday visitor—excellent facilities for motoring, boating, fishing, hunting in season, and all outdoor recreation.

Reaching from the Gulf of St. Lawrence to the head of Lake Superior, a voyage of 2,000 miles, one of the world's great systems of inland waterways traverses Eastern Canada. Nowhere exists an interior water route more varied than that traversed in a trip up the storied St. Lawrence, touching at historic Quebec and busy Montreal. Leading on through the Thousand Islands and the Great Lakes, past Toronto, Niagara Falls and a dozen other centres of commercial or scenic interest, such a voyage reveals the heart of Eastern Canada and leaves a vivid impression not only of the natural beauty but of the business life of this part of the Dominion.

The Laurentian region—the huge horseshoe skirting Hudson Bay to the east, south, and west—is pre-eminently the country of forest and stream, of hunting, fishing, and canoeing, of great unexplored areas. Countless lakes and rivers form a network of endless highways routing the canoeist through a hinterland where trout, bass and maskinonge, moose, deer and bear, stock a superb field for the sportsman.

The prairies are less familiar as a holiday region. Yet, for thousands of

visitors, the fertile western plains with their endless miles of rippling grain present a scene of beauty and satisfaction to countless visitors. Beautiful summer resorts nestle on the shores of prairie lakes, and for the enjoyment of the sportsman few fields offer finer attraction than the hunting, in season, of prairie game birds.

For scenic splendour the Rocky Mountains have been declared by many experienced Alpine climbers to be unsurpassed. Majestic ranges, scarred by age and weather, rear their summits against sky of purest blue or bury their snow-capped peaks in fleecy clouds. Glaciers and waterfalls, emerald tinted lakes and wooded valleys combine to entrance the eye and the enchantment is increased by the alpine air fragrant with the scent of pine and fir. The mountains are noted for their big game—big-horn sheep, grizzly bear, Rocky Mountain goat, elk, deer, moose, caribou, black and brown bear, and mountain lion.

Canada's Pacific coast, with its forests and inlets, is a revelation to the tourist. Its moderate climate makes it an all-the-year-round playground for thousands, while its hunting, fishing, and other sporting attractions are unequaled on this continent.

Taking into account the scope, the variety and the steadily widening renown of the Dominion's recreational attractions, there is ample ground for the view that these natural assets will, through their direct and indirect commercial effects, prove to be one of the major forces of Canadian development in the next generation.

Winnipeg Newspaper Union

(By Anabelle Worthington)

2846

Smart young things are including many silk crepe frocks in their Spring wardrobe to be worn with separate coat to carry out ensemble theme.

The youthful animation of hem, makes this model especially attractive, for it is equally smart worn without a coat.

The cap sleeves of the yoked bodice are outstandingly chic in pointed treatment.

It is nipped in at normal waistline by narrow belt.

Style No. 2846 comes in sizes 14, 16, 18 and 20 years. In the 16-year size, 2 1/2 yards of 39-inch material with 1/2 yard of 39-inch contrasting is sufficient.

Grain Elevator For Churchill

2,500,000 Bushel Grain Elevator To Be Completed By September 1931

Tenders for a 2,500,000 bushel grain elevator at Port Churchill, the terminus of the Hudson Bay Railway, have been asked by the Department of Railways and Canals.

It is planned by the department to have this elevator completed by September 18, 1931, in time for the handling of next year's crop. As from 600 to 800 feet of deep water dock will have been constructed by that time, it will be possible to load ocean ships at the elevator.

It is planned to resume the regular weekly, if not twice-weekly train service between The Pas and Churchill, for the use of Canadian National Railway officials and those at work at the Bay terminus. As there is yet no provision for people other than those actually employed at Churchill, outsiders will at least be discouraged from going there.

Deadly Carbon Monoxide

Risky To Run Car In Garage Even With Doors Open

In view of the deaths which are being so constantly reported through the deadly carbon monoxide gas, it is worth while to draw attention to the warning just given by Professor Norman Hall, of Manitoba University. The figures he gives as to the danger of this gas are startling, as he finds that a mixture of few parts of it to 10,000 of air is very dangerous, but that one of 15 to 20 is absolutely deadly. The percentage which will be formed in a small garage in a few minutes is greater than this. One particular point is urged by the professor, that it is not safe to run the engine in a garage for any length of time with the doors open, for if the wind should happen to be blowing into it this would be tantamount to closing the doors.

Merchant Has No Comeback

Partridge Breaks Plate Glass Pane In Store Window

When storekeepers have plate glass windows broken they usually look for the price of a new one, and quite frequently get it. But in the case of A. Livingstone, Dubuc, Saskatchewan, who had a large plate glass window broken the culprit gave his life for his rash act. Possibly the merchant was not even then satisfied. The culprit was a partridge, which smashed the glass all to pieces when it flew against the window. Its neck was broken by the impact.

For Improved Livestock

The first "Improved Sire Area" in Manitoba has been established in the municipality of Roland, according to an announcement made by Albert Prefontaine, Minister of Agriculture. Under the Improved Sire Area Act, all bulls, boars and rams must be inspected and approved before the owners of same are permitted to retain them for service in the area.

Monkeys trained to operate them are used to try out new types of parachutes in Japan.

Strange Blue Grass

Thrives In Winter Will Grow Under Adverse Conditions Without Cultivation

Experts from the United States Department of Agriculture predict that the strange winter blue grass discovered on an Oregon farm and believed by them to be the "lost grass" of Europe, may revolutionize farming and dairying industries.

The story of the grass is a farm romance. Similar to grass which disappeared in Europe a century or more ago, it dies down in summer, when other grass is green, but thrives in winter, when food for livestock is low. It forms a perfect turf, even under the snow.

Because the experts found it will grow under adverse conditions, without cultivation, and will thrive in rainy regions, they view it as a solution of the problem of utilizing logged-off lands of the Pacific northwest.

Seeds for use in the Pacific northwest will be sold exclusively in Seattle by the Children's Orthopedic hospital. The agency was a gift of Mrs. E. B. Hanley, on whose farm the seed was found, and will be a source of permanent income for the hospital.

Yellow Journals In Shanghai

People Have To Be Circumspect To

The Chinese business or professional man who strays from the straight and narrow path usually reads all about his sins in the papers.

A survey made recently by military authorities indicates that there are more scandal sheets in Shanghai than any other city in the eastern hemisphere and probably in the world. One hundred and ten yellow tri-weekly newspapers are published in the Asiatic metropolis and are all devoted to printing news not fit to print.

To keep these papers supplied with information concerning the doings of Chinese who are in the spotlight, a large army of Chinese scandal mongers is constantly kept on the job. They appear at the most amazing times and at the most inconvenient places.

Special Type Of Piano

German Manufacturer Solves Problem Of Difficult Transporter

In order to transport pianos over mountain trails or difficult roads, an enterprising German manufacturer has constructed a special type of the instrument, which permits it to be carried on horseback. The piano has a U-shaped lower section which fits the animal. Other planes are made dismountable so that they can be transported in several packing cases on the backs of mules, and assembled on delivery, because the instrument would be ruined were it to be hauled over many of the trails for hours, and often days, in a cart drawn by oxen.

An average of 3,000,000 persons are ill in the United States every day.

SUGARING TIME

You can't fool these two youngsters about this spring business. When there is a sound of preparations in the maple bush, the fragrant scent of burning hard wood and glint of sap pails, it's a sure sign that spring is here. Here we see "Jack" and "Jill" who don't need to go up the hill, and furthermore, it isn't water.

The Present Market Condition Clearly Reflects Success Of Pool Says Professor Fay, of Toronto

Control Wolf Menace

Bounty Offered For Destruction Of Wolves In The North West Territories

The Department of the Interior, through its North West Territories and Yukon Branch, wages a continuous fight to control the ravages of wolves on the wild life of Northern Canada. Realizing the tremendous toll taken annually by wolves, principally among the caribou, and the serious destruction caused along trap lines by the mutilation of the pelts of fur bears caught in the traps, the Department has for a number of years been experimenting with various methods of control. The most effective scheme to date has been the increased bounty of \$50 per wolf pelt put into effect in 1924.

Under the regulations the hunter or trapper turns in the wolf pelt and receives the bounty, the pelt becoming the property of the Department. In this the wolf is being made to pay for his own destruction as the money realized from the sale of the pelt at the fur auctions has greatly reduced the cost of the increased bounty system. Owing to the high prices which prevail in the fur trade for choice wolf pelts, not all of the pelts are turned in for the bounty, but the record of those on which bounty has been paid and which have been forwarded to Ottawa during the fiscal year ended April 1, 1930, shows that 938 wolves were killed in the last twelve months as compared with 1,940 in the same time last year.

Japan Takes More Wheat

Half Of 1929 Import Was Purchased From Canada

Not only did Canadian-Japanese trade reach a new record in 1929, but Canada supplied Japan with one-half the wheat imported by that country.

This is shown in statistics prepared by the Department of Finance, Tokyo, and announced in a statement from the Japanese consul at Vancouver. The statement further remarks: "While the import of wheat from Canada is increasing year after year, imports of wheat from the United States is decreasing in proportion. In 1927 Canada's share was one-third of the total imported into Japan, while in 1929 it increased to one-half of the total, followed by Australia and the United States."

The value of Canada's wheat export to Japan was more than \$17,500,000, an increase of more than \$1,750,000.

Canada's total exports to Japan amounted to nearly \$34,500,000, an increase of about \$1,125,000 over the preceding year. Japan's exports to Canada remained stationary at \$15,500,000.

In 1929 Japan's import of pulp showed a decrease, but Canada continued to lead in that market with \$2,225,990 worth, followed by Norway and the United States.

The Time To Advertise

Greatest Need Is When Things Are Looking Bad

There is a curious idea which dominates the minds of some people that the time for advertising a particular product is when the market price is good as the result of a strong demand, and that it is futile to advertise when prices are low. The fact is that there is no particular season for advertising, and, for the best results the product in question must be kept before the public eye at all times and all seasons. When the market is good, advertising can help to keep up the demand; when it is bad it can assist in creating a better demand. Indeed, it is when things are looking bad that there is the greatest need for advertising.

Has Sunless Winter

Like Hammerfest in Norway, Prusna is a village upon which the sun never shines during the winter. The name of the community is Fortinglaxwasser, and it is located in the Giant Mountains. Two mountains shelter the village from the winter sun the whole day long, so that the village has nothing but twilight in which to do its work from sunup to sunset.

Heart disease, cancer and accidents claimed more victims in 1929 than in former years.

A pineapple taken to London ahead of season by a sailor was sold for \$25.

The easier a girl is to look upon the harder a man will look.

The Canadian people have confidence in the Wheat Pool and the present condition of the market clearly reflects the success of the Pool, says Professor C. R. Fay, of the economics department of Toronto University. Professor Fay has just completed a survey of the western grain situation and will shortly proceed to England to examine the status of the Canadian Wheat Pool there.

"After my investigation I am a strong supporter of the Pool as it has functioned hitherto as a voluntary organization," he said. "There has been an attempt made in Saskatchewan to make it compulsory for farmers to sell their wheat through the Pool. I am strenuously opposed to that."

The fact that export trade was improving was another indication of improvement in the wheat situation, said Prof. Fay. Considerable attention was fixed on the American winter wheat crop. However, absence of rain there and only moderate increases of exports have caused farmers to cease to worry on that score.

Talking over the general situation last year with both representatives of the wheat trade and the Pool, Professor Fay was convinced that North America had been most "bullish" in its wheat trading.

"Most emphatically the Pool was not holding out when the trade was selling," he said. "The Pool was offering wheat continuously all summer and fall at below Winnipeg prices in an effort to dispose of the wheat crop."

"But in order to compete with the unusual Argentine crop, it would have been necessary to sacrifice grain as low as 20 cents below the Winnipeg prices, which was unreasonable," he continued.

"The difficulty in 1929 was to move the limited quantity of high quality Canadian wheat to Europe, which was determined to depend on its own wheat crop. There is no question of a boycott of Canadian wheat," said Professor Fay. "The tariff wall in England and Europe is just a case of need of tariff protection for local growers against the cheaper Argentine wheat. The ban was not directed at Canadian wheat, but the higher grade grain has suffered, with the lower grade Argentine product. The United States has been a strong, stable organization, whose members are standing fully behind it. Even though many of the western farmers are so short of money that they have had to sell their seed grain in order to live, they are supporting their Pool," he said. "The division in Saskatchewan has died down and it is now less acute than in the period of low prices."

Queer Sight In Cuba

Trees Grow In Limestone Areas With Little Care

Huge trees growing without any visible means of support are one of the queer sights of the Zapata swamp of Southern Cuba, which is nearly 1,500 square miles in extent. Many varieties of trees, some 4 feet in diameter, are found growing in limestone areas where not so much as a single spoonful of soil can be gathered from an acre. The trees make a start in small pockets and holes in the limestone, where collections of leaves with cover for growth. In their search for food the roots stray about over the surface of the rock, finally plunging through holes to find sustenance in soil hidden deeply in the cavernous recesses of the coral stone.

Nearly 5,000,000 persons with incomes of more than \$675 a year were assessed for income tax in England in the last fiscal year.

WORLD HAPPENINGS BRIEFLY TOLD

The 900th anniversary of the Speyer cathedral will be celebrated on July 12, 13 and 14 of this year.

Summer time in England went in to effect at 2 a.m. April 13, and clocks were set one hour ahead.

Pilot Marmor broke the French record in a seaplane, landing after thirty hours, twenty-five minutes and forty seconds in the air.

The salaries and expenses of the pensions appeal board of Canada last year were \$45,100. In excess of the awards they had made.

Production in the cotton and jute industry of Manitoba for 1928 amounted to \$5,043,413, which is a little more than one-fifth of the total production for Canada.

Kaye Don, British automobile racer, has definitely abandoned his plans for attempting to beat the world's automobile speed record at Daytona Beach, Florida.

Marquis still constitutes more than one half of the western grain crop, growing tests of samples taken from forty-eight cargoes of Canadian wheat exported to England in 1928-29 show.

Plans to negotiate a parcel post treaty between Cuba and Canada are being studied by the Cuban state department. The treaty would seek to increase the consumption of Cuban products, principally sugar and tobacco in Canada.

Thirty-four dairy herds qualified this year for honor roll certificates issued by the Department of Agriculture. On this basis of this newly introduced system of recognition 13 herds would have qualified in 1927, and 27 in 1928.

University Students in Canada

56,042 Students Enrolled At the End Of 1928

Students doing work of university standard and taking matriculation courses in Canada at the end of 1928 totalled 56,042 of whom about 20,900 were women. Of the total 40,987 were full time students, 3,613 part time and 11,603 vacation short courses and extension students, 261 being duplicates enrolled in more than one category.

There are 23 universities in Canada, of which six are state controlled. The total teaching staff of universities numbers 4,078, of whom 3,544 are men and 534 are women.

In all the educational institutions of Canada the enrolment totals 2,342,391, of which 2,054,286 attend publicly controlled kindergartens, elementary and secondary schools.

"Willie, didn't I tell you to shut that shutter?" said Willie's mother.

"The shutter's shut," replied Willie, "and I can't shut it any shutter!"

Eight ambulance airplanes now operate through the Sahara Desert.

PHILLIPS
For Troubles Due to Acid Indigestion Acid Stomach Headaches Gas-Haunts

Too Much Acid

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, quick, harmless and efficient, is in Phillips' Milk of Magnesia. It has been maintained for 50 years the standard with physicians. One spoonful in water neutralizes many times the volume in stomach acids, and at once. The symptoms disappear in five minutes.

SUNDAY SCHOOL LESSON APRIL 27 EASTER LESSON

Golden Text: "He is not here; for He is risen."—Matthew 28:6.
Lesson: John 20:1-16.
Devotional Reading: Ephesians 1:15-23.

Explanations and Comments

Mary Magdalene's Discovery of the Empty Tomb of Christ, verses 1-2.—A stone had been placed over the entrance of the tomb in which the body of the crucified Saviour had been laid (Mark 15:46); and the stone had been sealed in a groove at the base of the opening of the tomb. Early on Sunday morning Mary Magdalene came to the tomb with the others, as the "we" in the next verse indicates. She found the stone removed. At once she hastened to tell Peter and John (John always refers to himself in his Gospel as "the disciple whom Jesus loved").

John's and Peter's Discovery of the Risen Lord, verses 3-10.—Peter John ran to the tomb. John reached there first, and, looking in reverently and wondering where the Saviour's body had rested, he beheld only the linen clothes in which it had been wrapped. Then he turned and ran back into the tomb and saw a wonderful thing: the linen clothes which had enveloped Christ were rolled up, and the napkin, which had been about His head, was in another place. Laid out as it was, he knew that Christ was risen. "When he had said this, he departed, and he had been Christ's departure; had others carried off His body, the grave clothes would have been rolled up. Then John also entered the tomb, and the sight sufficed him; he believed that Christ was risen. "What was it that John believed? That Jesus had risen? Surely this, but further, that as Jesus had said, "I was therefore the divine Son of God." The conviction then produced was the origin of his Gospel, the source of a life of loving devotion for the apostle John.—C. R. Erwin.

Mary Magdalene's Discovery of the Risen Lord, verses 11-16. Mary, who had followed Peter and John back to the tomb, remained outside, weeping. Looking into the tomb she saw two angels clothed in white and sitting where the body of Jesus had lain. The Greek word for "angel" means "one who is sent with a message," and their message for Mary was, "Woman, why weepeth thou?" There was cause for weeping, but great reason for rejoicing.—The Lord had risen.

"John's insight taught him first to conclude that his Lord had risen; Mary's went straight to the heart to satisfy it," for as she turned she beheld Jesus standing. But she did not recognize Him as her Lord. "Why do you stand here, weeping?" (Matthew 28:17; Mark 16:12; Luke 24:16, 37 and John in 21:4), speak of His form as she saw it. "Why do you stand here, weeping?" (Matthew 28:17; Mark 16:12; Luke 24:16, 37 and John in 21:4), speak of His form as she saw it. "Why do you stand here, weeping?" (Matthew 28:17; Mark 16:12; Luke 24:16, 37 and John in 21:4), speak of His form as she saw it.

Supposing Jesus to be the gardener, or garden-keeper, the only one who would naturally be there at that hour, Mary said to him, "Sir, if thou hast borne Him hence, tell me where thou hast hid Him, and I will take Him away." How natural it was that she did not mention Jesus' name: there could be no one else thought of.

"Mary," said Jesus, and "Rabboni," Teacher, she cried. "It was only an instant's work, but all the quick emotions of a life-time were endured. That voice in a flash the cross was forgotten, the tomb forgotten, the mystery of how the dead could live again was unthought of. "Mary!" Master! Deep called to deep, and the testimony of the inner spirit defied all logic and all contradiction. "I know that my Redeemer liveth."

Along the Frontiers in Manitoba

Manitoba May Develop Salt Water Fishing At Churchill

Manitoba, with Churchill as its seaport, has assumed the status of a Maritime province, and development of an extensive salt water fishing industry is one of the possibilities in the near future. Hon. D. A. McKen- zie, Minister of Mines and Natural resources, prophesied such an industry during an address in Winnipeg. He had been informed by those qualified to speak that there was every prospect of good fishing being conducted on a large scale, with Churchill as the base for the fishing fleets.

Too Much Acid

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy remedy. Please do that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting stomach acids. Each bottle contains full directions—any drugstore.

WHY SUFFER FROM-YOUR LIVER?

Why be handicapped with unsightly blotches on the face, eyes with yellow tinge and that tired and languid feeling? This indicates a torpid liver. Headache, Dizziness and Biliousness surely follow. You must stimulate your liver, start the bile flowing with Carter's Liver Pills.

They also act as a mild laxative, purely vegetable, free from calomel and poisonous drugs, small, easy to swallow, and not habit forming. They are not a purgative that cramps or pains, unpleasant after effect following, on the contrary a tonic to the system.

All Druggists 25c and 75c red pills.

Southerners Are Anxious To Visit Canada

Opening Of Hudson's Bay Route Has Been Great Advertisement

Thousands of American tourists from the southern states will visit Canada this year as a result of the advertising given the Dominion through the opening of the Hudson's Bay Railway, states E. A. McCallum, of Regina, who returned to the city after a three months' vacation spent in Mississippi and Alabama.

"Everywhere I found the greatest interest in Canadian affairs," Mrs. McCallum said. "The opening of the Hudson's Bay route has been a tremendous factor in calling attention to the development in this country. Many of these southerners had had an idea Canada was a land of snow and 60 below zero temperatures. Now they want to see this great country which has an ocean outlet at its extreme north."

Winnipeg Newspaper Union

John

(By Annebelle Worthington)

A navy blue silk crepe that expresses simplicity and good taste for mature figure. The circular skirt in wrapped treatment falls in graceful drapes at left-side front, giving the figure charming length.

The hips are extremely flat. The surplus bodice with collarless neckline, shows lingerie influence in white crepe vestice. It's a stunning dress for street.

Style No. 3363 comes in sizes 36, 38, 40, 42, 44, 46 and 48 inches bust.

Printed crepe with plain, light weight woolen and crepe marocain appropriate.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

Rubber Overshoes For Planes

Lace Over Wings and Prevent Formation Of Ice

Overshoes for aeroplanes—a new method of keeping wings free of deadly ice—were announced at Cornell University, Ithaca, N.Y.

They are a discovery in safer flying announced as a result of "successful tests" in the mid-west.

The overshoes lace over the forward edge of the wing. They are a thin layer of specially vulcanized rubber exuding continually a colorless oil which is the secret of the success. It is announced that the ice does not stick nor the oil "scrub off."

This slipperiness alone is insufficient and so the overshoes have a small hose over their striking edge. A slight pulsation of pump driven air in this hose breaks the ice as it forms on the wing edge, and so prevents air from pressing the forming ice fast against the wing.

Sodium Sulphite Deposits

Over One Hundred Million Tons Of Natural Hydrous Sulphite Found

As a result of investigation made by the Canadian Government Department of Mines, it has been established that the sodium sulphite deposits in the Province of Saskatchewan contain over 100,000,000 tons of natural hydrous salt. These deposits have been looked on as of great potential value not only to meet commercial requirements in Canada but because of the possibility of developing important export markets. One of the important uses in Canada is in the pulp and paper industry where large tonnages of the anhydrous sodium sulphite or "salt cake" are used in the production of sulphate or kraft pulp.

Everybody Satisfied

Family Could Enjoy Reading Paper By New Method

The latest invention is a machine which read aloud from the printed page. This should prove a boon to the army of men who have to hurry to work in the morning. They could get their morning paper, set the machine going while they whittle in the bathroom, take it to breakfast and let it run till they bid good-bye to their superior halves at the front door, by which time they would have heard the chief news. Then the paper could be left for the ladies of the household to read the shop advertisements, the social news, etc. The whole house would be satisfied.—Montreal Gazette.

King Bugs Stamp Collection

King George V, who is an ardent stamp collector, has purchased the famous Purves collection of Australian stamps, which was awarded the gold medal at the 1928 international philatelic exhibition at Melbourne. The price is believed to have been two thousand pounds. The collection contains examples of all issues, many of which are unique.

Children CRY for it

CASTORIA

It may be the little stomach; it may be the bowels are sluggish. No matter what coats a child's tongue, its a safe and sensible precaution to give a few drops of Castoria. This gentle regulation of the little system soon sets things to rights. A pure vegetable preparation that can't harm a wee infant, but brings quick comfort—even when it is colic, diarrhea, or similar disturbance.

And don't forsake Castoria as the child grows older. If you want to raise boys and girls with strong systems that will ward off constipation, stick to good old Castoria; and give nothing stronger when there's any irregularity except on the advice of a doctor. Castoria is sold in every drugstore, and the genuine always bears Chas. H. Fletcher's signature on the wrapper.

Recipes For This Week

(By Betty Barclay)

VANILLA DESSERT WITH CHOCOLATE SAUCE

1 package vanilla junket. 1 pint milk.

Prepare junket according to the directions on package. Let stand until firm, then chill.

Cocoa Sauce: Melt 1 square unsweetened chocolate in saucepan, placed in large saucepan of boiling water. Add 1 tablespoon melted butter, and when thoroughly blended, pour on gradually, while stirring constantly, ½ cup boiling water; then add 1 cup sugar. Bring to the boiling point and let boil fourteen min- with ½ teaspoon vanilla.

BAKED ECONOMY

Into a well-buttered pan put slices of raw peeled potatoes and a little pepper. Then a layer of uncooked, sliced ham. Add another layer of potatoes and ham and pour on this cream sauce (1 tablespoon flour, 1 cup milk).

Sprinkle bread crumbs on top and bake in a moderate oven until brown and potatoes are well done. Serve hot. Just enough ham can be used to give the desired flavor, which has the advantage of making a little ham go a long way. For picnics this can be baked at home in a heavy tin dish with a cover and reheated over hot water on a campfire.

Taxes for the relief of the poor have been levied in England since 1573.

Just as it has been for ages, work will continue to be the best exercise in 1930.

London's Busiest Woman

Known as London's hardest-working woman, Mrs. Alice Tabrahams, a widow, has just announced that she will retire, after 25 years of public life. In the morning she works as a scrubwoman in the offices of the local Labor Party; in the evening she presides over the Edmonton Education Committee or attends the Urban District Council, of which she is a member. In addition she does all her own housework and cares for her children. She says she needs a rest.

Where Canada Leads

Canada is the largest exporter of wheat among the countries of the world and the second largest exporter of flour, being exceeded only by the United States.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARN SUNROOMS ETC.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

EMIGRATION TO CANADA SHOWS BIG INCREASE

London, Eng.—Emigration to Canada has increased more than 25 per cent. during the past four years, although emigration to dominions generally has shown a considerable falling off since 1926, it was disclosed in the House of Commons.

Hon. W. R. Smith, parliamentary secretary of the Board of Trade, in reply to questions asked emigration to Canada had increased year by year, namely from 49,632 in 1926, to 65,558 in 1930, while Board of Trade figures showed the aggregate emigration to Canada, Australia, New Zealand and Australia had decreased from about 119,000 in 1926 to about 84,600 in 1930.

The colonial office also was questioned with regard to Dominion emigration, Dr. Drummond Shiels, parliamentary under-secretary, stating he would circulate detailed figures later. He gave the same figures as Mr. Smith for Dominion emigration generally, stating emigration to Canada showed an annual increase.

Twelve Rescued From Sea

Voluntary Missionary and Family Stranded in Motor Boat

Panama City.—Stranded for nine days in a motor launch in the Caribbean Sea east of Colon, J. W. Miller, of Jacksonville, Fla., and his wife and nine children and a negro seaman were rescued by the Cuban gunboat "Patria" when their doom from starvation and exposure was imminent.

Miller and his family, the youngest of whom were seven months old, started out from Boca del Toro, Panama, for Colon in a small motor boat. Six days later they ran out of fuel while only a short distance from their objective.

For days after that he watched for craft which might help him to get to Colon. Twice he signalled passing boats with a small flag he had with him, but was unable to make himself seen. The "Patria" sighted him about three miles off Colon and brought the party of 12 to port. The Millers are a family of "voluntary missionaries." They left Jacksonville in June, 1928, for a cruise through the West Indies, and in the course of their trip they founded the mission "Church of God" on the Isle of Pines, Cuba.

Keeping Up Record

World's Champion Egg-Laying Hen Still Leads in Production

Saskatoon. — Lady Victorine, world's champion egg-laying hen, is doing very well in her second year. When this Barred Rock pullet, who lives at the University of Saskatchewan, completed her first year of egg production, during which she laid 358 eggs, she did not moult immediately but laid another 16 eggs last September.

Towards the end of December she resumed business, laying four eggs in that month. In January, February and March she worked steadily and produced as many eggs as the average Saskatchewan hen does in a year.

France Protects Auto Industry

Paris.—From ten to 60 per cent. higher tariffs on United States automobiles became effective under a bill passed by the chamber of deputies and the senate. The government contended the law was intended merely to simplify the customs routine by changing from ad valorem to specific duties. Arguments in parliament were based upon the theory that the French auto industry needs more protection.

Will Repeal Clause

London, Eng.—The House of Commons has voted, 194 to 50, to restate in the Army Estimates bill the clause abolishing the death penalty for cowardice and desertion. This was the answer of the Lower House to the action of the House of Lords in deleting from the bill the clause going away with the penalty.

Presentation For Byrd

Wallingford, Conn. — A sword wrought in gold, silver and enamel to commemorate Rear-Admiral Richard E. Byrd's achievements as geographer, flyer and seaman will be produced here for the State of Virginia. It will be presented by the state to Admiral Byrd upon his return from the South Polar regions.

A new electrical device can be used to seal broken blood vessels.

W. N. U. 1934

Predicts Early Election

May Be Held This Year, Says Hon. R. B. Bennett

Calgary.—"All appearances point to the calling of a Dominion election before the end of the present year," asserted Hon. R. B. Bennett, on his return to Calgary following adjournment of the Federal House for the Easter recess.

"I notice that one of the government supporters in Edmonton has fixed the date on which an appeal will be made to the people, but I doubt if the Prime Minister himself has yet determined that point. The budget will probably be delivered shortly after the Easter recess," Mr. Bennett continued, "and there is much conjecture as to what it will contain. Undoubtedly promises have been made to the agriculturists of Quebec that a tariff will be imposed on fruits and vegetables, and the iron and steel producers have been assured that their industry will receive protection under the new tariff."

"The action of Australia in imposing a surtax to practically prohibit the importation of many commodities is justified by the Australian Government as the Canadian Government imposed a dumping duty of six cents per pound on importation of butter from Australia after a treaty had been signed between Australia and Canadian Governments agreeing to a duty of one cent per pound on these importations. The whole problem of Australian trade is engaging the attention of the government at the present time."

Tariff Commissioner Retires

Fellow-Workers Of J. A. Russell Hold Banquet In His Honor

Ottawa, Ont.—Warm appreciation of the faithful and efficient service which he has given to the Dominion over a period of more than half a century was voiced at a banquet given in honor of James A. Russell, retiring commissioner of tariffs for the department of finance.

The event was signalled by the attendance of friends and fellow-workers of Mr. Russell, from the department of finance, the department of national revenue, the tariff advisory board, and the department of agriculture, who gathered at the Royal Ottawa Golf Club to do honor to the retiring commissioner.

After serving the country for fifty-three years, during which time he was associated with six finance ministers, Mr. Russell retires on pension under the seventy-five year age provision.

Trouble In British Textile Mills Growing

Workers Fighting Wage Reduction Employers Deem Necessary

London, Eng.—Day by day the prospects of a long stoppage of work in the woolen and textile industries seem to be growing and it is now feared—unless the government steps in—the country may face a long and bitter struggle between the men and women who will not accept wage reductions and the employers who, acting on the report of Lord McMillan, deem such reductions necessary to the continued existence of the industry.

Today the General Trades Union congress appealed to its affiliated trade unions for financial assistance for the Yorkshire workers. The general council itself headed the list with a contribution of five hundred pounds, or about \$2,435.

Plans Return Next Year

Kaye Don Faced Many Difficulties In Trial For Speed Record

New York.—Kaye Don's first attempt to smash the world automobile speed mark on the sands of Daytona Beach is over but the dapper little Englishman with the bristly blonde mustache will be back again for another go at it next year.

It has been anything but a pleasant expedition for the debonair king of Britain's amateur tracks who set forth like a schoolboy on a holiday two months ago to crash Sir Henry Seagrave's mark of 231 miles an hour in the massive Silver Bullet built especially for him by the Sunbeam Motors of England. Twenty-two times Don battled a set of coughing motors and the unsavory rough Daytona sands without coming closer to the record than 198 miles an hour.

Thousand Acres Sown

Lethbridge, Alberta.—O. E. Laster has completed sowing 2,000 acres of wheat in summerfallow. Several farmers of the Bow Island district have finished wheat seeding. The recent rainstorm is the cause of much jubilation by these farmers.

Canadians Well Informed

Are Acquainted With Public Affairs Says Lord Willingdon

Vancouver.—The difficulties of a governor-general who is being constantly asked to deliver addresses and yet is surrounded by limitations in what he may say, were good-humoredly referred to by His Excellency Lord Willingdon in addressing a luncheon of service clubs here.

Speaking of the work of service clubs and of the opportunity they offered for the study of public affairs, Lord Willingdon expressed his opinion "that the citizens of Canada are perhaps better informed on public affairs than citizens of any other country. I wish that in my country we had more of these organizations so that the citizens of my country would know more of empire affairs than they do now."

To Cut Grain Acreage

Special Survey Discloses Substantial Reductions In North Dakota

Washington, D.C.—Governor George F. Schafer, of North Dakota, and John L. Coulter, chief economist of the tariff commission, told Chairman Alexander Legge that substantial reductions in both hard and soft spring wheat acreages may be expected in North Dakota and neighboring areas covered by a special survey made by Coulter.

The eastern section of North Dakota, the chairman said, is expected to reduce its acreage of durum wheat more than the 15 per cent. forecast by the Department of Agriculture. The reduction of hard spring wheat in the western section will be less, but of considerable importance.

MANY INJURED DURING SERIOUS RIOT IN INDIA

Calcutta, India.—Nineteen persons were injured in heavy fighting between Nationalists and police in the Showanipore Sikh quarter of Calcutta. Train cars were burned in both Calcutta and Bombay and armed gangs patrolled the streets of the latter city when students and carter joined in the attempt to stop vehicular traffic by obstructing roadways and train-lines.

Six European officers were among the injured at Calcutta. A European woman cycling in the district, was forced to dismount and abandon her machine when she was stoned by the crowd. She received nasty gashes. Ten Khalsias were injured.

There were unconfirmed reports of firing in North Calcutta. Armed police were on duty throughout the affected area and armored cars were active.

Seven British officials were injured by the time the situation was brought under control. Two members of a South Calcutta mob were injured when a European police sergeant opened fire to save an injured fellow-officer who was being attacked. A fireman suffered a fractured skull when he was attacked by a crowd opposing his efforts to extinguish a tram-car blaze.

Miss D'Alie Dench, London girl, who attempted against police advice to ride a motorcycle through a riotous section, was taken to a hospital with deep gashes from stones which the hostile mob flung at her. Her way was blocked and she had to run for her life amid a hail of broken road material.

Canadians at White House

Hon. Vincent Massey, Canadian Minister to the United States, accompanied E. W. Beatty, chairman and president of the Canadian Pacific Railway, on visit to President Hoover recently. They are here seen leaving the White House in Washington.

ANGLO-CANADIAN COMEDIENNE

Beatrice Lillie, the vivacious Anglo-Canadian comedienne, is now in Hollywood preparing to make a talkie. She is the wife of Sir Robert Peel.

Britain Acts On Liquor Shipments

Will Introduce Bill To Safeguard Interests Of U.S.

London, Eng.—The House of Commons, by a vote of 215 to 142, gave a Liberal member leave to introduce a bill to entitle the board of trade to suspend or cancel the certificate of any master, mate or engineer engaging in the illicit importation of intoxicating liquor into United States territory.

After Isaac Foot, Liberal member from Cornwall, had spoken for ten minutes advocating the measure, Frederick A. Macquisten, Conservative member from Argyll and a lawyer who sometimes acts professionally for the liquor trade, opposed the bill in a speech filled with humorous remarks.

Lady Astor, United States-born peeress and ardent temperance advocate, interrupted Macquisten several times.

Night Editor Of Calgary Herald Dead

P. W. Stone Was Well Known Throughout Canada

Calgary.—Percy W. Stone, for more than ten years night editor of the "The Calgary Herald" and known from coast to coast as one of Canada's veteran newspapermen, died, April 15, following a heart attack. He was 54 years of age. Prior to becoming associated with "The Herald," Mr. Stone worked on "The Winnipeg Telegram," and later became editor of "The Bassano Mail," and managing editor of "The Crag and Canyon" in Banff.

Mr. Stone was an Englishman by birth, but came to Canada as a boy and taught school in Ontario before coming west.

Driftage To Span Atlantic

London, Eng.—The British dirigible R-100 will attempt to bridge the Atlantic this spring, the first step toward the British dream of an air-linked empire. Meanwhile the Graf Zeppelin will start on its sixth trans-Atlantic trip. The United States, focal point of former air line crossings, will be neglected, for the R-100 will point for Canada and the Graf for South America.

Lightning Wrecks Radio

Monkots, Sask.—The radio set was completely demolished and the house wall set on fire when the home of Alfred Jensen, here, was struck by lightning during a severe thunderstorm, accompanied by heavy rains.

Establishes New Speed Record

Pilot Buchanan Makes Fast Flight From Winnipeg To Regina

Regina.—A flight from Winnipeg to Regina in two hours and 45 minutes, establishing a new speed record for that leg of the Western Canada air mail service, was made by Pilot W. J. Buchanan on April 13, in a Fokker F-14 machine.

He left Winnipeg at 9:05 p.m. (Winnipeg time), or 8:05 p.m. Regina time, and arrived here at 10:50 p.m. (Regina time).

There was a 25-mile an hour wind blowing from the southeast during most of the flight, but unfavorable weather made it necessary for him to "fly blind" from Broadway to Regina. The total distance is 330 miles.

Surveyed Air Mail Routes

Superintendent Of Airways Returns To Ottawa From West

Ottawa.—Making a two-day stop-over flight from High River, Alberta, to the capital, Superintendent J. H. Tudhope, superintendent of airways for the civil aviation branch, has returned from a survey of air mail routes in Western Canada. The return flight of approximately 2,500 miles was made in 17 hours and 50 minutes flying time. Five stops were made.

Major Tudhope's survey had as its purpose an investigation of possible routes for the final links in Western Canada of the trans-Canada Air Mail Service, to be completed in the near future.

Impressed With Bay Port

Development At Churchill Was Surprise To Premier Bracken

The Pas, Man.—Churchill probably will be thrown open to the public this year is the opinion of Premier John Bracken, who has returned from his first visit to the northern seaport. Mr. Bracken stated it would seem unwise to open the port to provision has as yet been made for public utilities other than those for the government men who will be employed there this year.

Premier Bracken stated he was impressed with the magnitude of the development at Churchill.

PROPORTIONAL REPRESENTATION VOTING SYSTEM

Ottawa, Ont.—Proportional representation, which now is occupying the attention of the administration and of the opposition members as well, is not a new subject in Ottawa. In the House of Commons a few days ago, Premier Mackenzie King introduced the government bill giving the matter consideration and said the progress made during the session will determine whether or not a bill is introduced.

In 1921, a committee of the House investigated "P.R." The committee recommended taking a plebiscite because it was "not prepared to recommend the application in the next general election." The committee was impressed by the arguments presented by the advocates of the system and in its report said:

"It must be apparent that the present system of elections in single-member constituencies meets fully the purpose intended only when no more than two candidates are nominated. Recent experiences in elections in Canada have brought home to our people the fact that when three or more candidates present themselves in single-member constituencies, the candidate declared elected may, and often does, represent merely a minority of those voting in the constituency."

It was after the 1921 election that a debate and division took place on the report. W. C. Good, Progressive member for Brant in 1923, introduced a motion calling for the adoption of "P.R." in multi-member constituencies. Practically all the then leaders took part in the debate and in the division that followed, the motion was lost. Among those who voted for it were Premier Mackenzie King, Hon. W. A. Fielding, and Hon. Ernest Lapointe, Minister of Justice. Right Hon. Arthur Meighen then leader of the Conservative party led the forces opposed to the motion although party lines were not followed rigidly in the division. Hon. Lucien Cannon, solicitor-general and Hon. James Malcolm, Minister of Trade and Commerce, were two of the present cabinet ministers who voted in opposition to the motion.

WORK OF NAVAL PARLEY GIVEN IN WHITE PAPER

London, Eng.—Parliament has received a "white paper" which summarized the work achieved thus far by the London naval conference.

Among other points Premier MacDonald cited the tonnage reductions negotiated and the attendant saving in money. In conclusion the "white paper" says:

"Important as are these financial savings yet a more important result of this first stage of the London conference has been the elimination of competitive building in cruisers and auxiliary craft between the British Commonwealth, the United States and Japan, with all that implies in not so much improvement of their political relations."

"Figures on agreement between those powers have been placed at a low level, and it is the earnest hope of His Majesty's government that during the next stage of the conference agreement may be reached with the French and Italian governments at levels which will permit their programs of tonnage figures being incorporated in the agreement already reached between the other powers."

"After signature of the treaty the conference will adjourn in order to give further time for negotiations between the French and Italian governments for the settlement of the difficulties which as yet prevent complete agreement."

"These negotiations may be prolonged and it is necessary that delegations from distant countries, which are so immediately concerned, should remain in London while the conversations are proceeding. It is for this reason that adjournment has been decided upon."

Will Not Seriously Affect Canadian Trade

Chancellor Of Exchequer Announces Tariff Changes In British House

Ottawa.—Tariff experts of the Dominion Government are busily studying the tariff changes announced by Rt. Hon. Philip Snowden, chancellor of the exchequer in the British House of Commons. The general opinion expressed is that they will not seriously affect Canadian trade. The fact that the McKenna duties remain on motor cars, motion picture films and musical instruments is most important.

The removal of the McKenna duties would have wiped out the advantage which Canada now has over the United States in the British market and the products would be allowed in free from both countries. According to information here based on Mr. Snowden's announcement, the first of safeguarding duties which will pass out of existence is that on lace and embroidery. This duty was put on for five years and would end on July 1 next. As Canada does not export this product it will not affect her. The Canadian cutlery comes off on December 22 next.

Prince Flies From Khartoum To Cairo

Expected To Leave Africa Very Shortly For England

Khartoum, Upper Egypt.—Prince of Wales and the party which was with him throughout his hunting in British East Africa, left here in six aeroplanes for Cairo. They will leave there for England shortly.

The Prince, before boarding the plane, put on a woollen jacket and scarf over his khaki shirt and shorts, because of the chilly morning.

Hardly had his plane, with four escort planes disappeared in the north when five other planes bearing other members of the party and baggage, departed.

Diocese Will Be Transferred

The Pas, Man.—Plans for establishment of Roman Catholic diocese headquarters at Churchill, on Hudson Bay, were revealed here by Rt. Rev. A. Turqueti, O.M.I., bishop of Chesterfield Inlet. The "Bishop of the Arctic" stated that no definite date had been set for transfer of the diocese headquarters from Chesterfield to Churchill.

Boys Killed In Fire

Lucata, Sicily.—Fifteen boys, ranging in ages between 15 and 18, were killed in a moviehouse fire and stunned. A general rush for the exits, following outbreak of fire in the film room, was the cause of the fatalities. In addition, three others were seriously injured and five were slightly hurt.

Exercise Needed To Keep Healthy

Moderation Necessary As In All Things, However

There is a saying which everybody has heard, because it is as old as the hills, that "all work and no play makes Jack a dull boy."

Somebody has abbreviated this to "all work and no play makes Jack." Both quotations have merit, but like most sayings of the kind, they are only partially true. A better rule in life for all of us to bear in mind is "be moderate in all things."

Being moderate applies particularly to the amount of exercise we should inject into our daily programme. It is a very serious matter and should be entered into with considerable thought. Too little exercise is conducive to a weakly constitution and too much exercise is apt to lead to serious consequences.

The object we should try to achieve is find the health habits which are best suited to promoting good health and to stick to them.

Now and then you may be induced by some energetic person to indulge in some form of sport or exercise which is altogether too strenuous for you. It is well to have a physician look you over before entering into anything which might by some chance result in physical impairment.

The importance of some form of exercise for everyone's muscle development, however, cannot be over-emphasized. The muscles of the body are made up of many strands, and these strands are made up of very fine fibres. The fibres are again divided up into separate parts or segments, and every one of these segments has its own blood and nerve supply. This is a very fine and intricate system, but we are absolutely dependent upon our muscles. Each muscle cord is attached to the bones, and if they weren't there, the whole framework would collapse and we wouldn't be able to stand up. And the muscles are so constructed that they must be exercised often because the more work they do the stronger they become. As an example of how this acts, if a man were to tie his arm to his side and not use it for some length of time he would find, when he released it, that he could not use it whether he wanted to or not. In other words, he would not have given his muscle system enough work, and as a result of this inactivity, the muscles forget how to function. The best exercise one can get as a rule, is something one likes to do. Fortunate indeed is the man or woman who can play golf, or tennis, or swim, or play almost any kind of game and get real pleasure out of it. But if we are not in a position to take part in this sort of recreation, we are by no means dependent upon them. There are number of things one can do that are of a very simple nature, and yet very enjoyable, if we enter into them in the right spirit. One of these things is walking.

A great doctor once wrote that the best way to acquire a good complexion is to bury a pot of paint two miles from your house and then walk out there every day to see if anybody had moved it.

Walking is undoubtedly, one of the best forms of exercise within the reach of any of us. It is an excellent plan to set ourselves to walk a certain distance every day, and then to go about it in a business-like manner. In order to get the full benefit from it, we must carry ourselves properly. Few people know how to walk. They stroll. And there is a vast difference between the two forms of ambulation.

Here is the way to go at it: Wear comfortable, loose clothing, and select a destination two miles away. Allow yourself half an hour to do the stretch and measure your steps so that you will arrive there promptly. Keep the shoulders back, head up, chin tilted, and swing the arms, just as they teach you in the army. This as a regular pastime is a lot of fun, if it is a nice day, and it will go a long way toward putting roses in the cheeks of the walker.

Cable Depreciates If Stored

Demand On Account Of Breakage Has Created Shortage

A world shortage on suitable deep sea cable is apparent, following the undue demands suffered by miles of cable destroyed by submarine earthquake of November 18, according to C. Berner, cable engineer, in charge of the repair expedition aboard the "Dominia," world's largest cable laying ship, which recently returned to Halifax. The "Dominia" arrived from London after being more than two months at sea, and took aboard buoy and supplies before resuming her work.

Such is the demand for suitable cable that the supply tanks at Gibraltar have been drained, and the cable previously stored there is being brought to Halifax by the Norwegian freighter "Ringer" operating in conjunction with the "Lord Kelvin," the "Dominia," under charter to the Western Union, repaired in 1910 New York-Bay Roberts cable damaged over a distance of about 175 miles.

Large stores of cable are not kept on hand because they depreciate faster than when in use. Mr. Berner explained. Mr. Berner was in charge of the laying of the high speed cable from Hay Roberts to the Azores in 1926, which is the fastest deep sea cable in existence, capable of transmitting several thousand letters per minute. Specially designed, it was calculated that the cable must be 1,341.17 miles in length. The cable was laid as called for, even to the last inch, which is stated to be one of the most remarkable achievements in cable laying on record.

Absolutely no signs of foreign substance on the ocean's bottom, nor any changes in soundings were reported by Mr. Berner.

Equipment Is Adequate

Nature Gives Every Creature Means To Protect Itself

It is curious to note the different ways in which Nature equips her creatures in order that they may be able, to a certain extent, to avoid death. Any animal, even if it has never set eyes upon water before can, upon being thrown into the water, instinctively swim. Even a cat, hating water as it does, at once strikes out and reaches the shore in safety, no matter if it is but a few days old.

In the same way Nature has equipped some of the creatures that exist in water with protection against various dangers.

A strange case is that of a minute insect that exists in ponds—the arcelle—which was recently a subject of investigation by Dr. Bies of Cambridge University. It was discovered that this tiny insect is equipped with a means of saving its own life if by any chance it strays into too deep water for its conflict.

Immediately the arcelle reaches water that has not enough oxygen to keep the insect alive a strange change takes place—a tiny hole in the creature fills with a kind of gas, and at once the little insect is carried up to the surface, almost as if it were in a balloon! And so, in this way, this small creature, that would otherwise, enjoy but a short span of life, goes about in comparative safety.

Attractive To Collectors

Pocket Dark Lantern Candelstick Was Very Compact

Flashlights, so necessary to the modern state of affairs, were probably the outcome of the early pocket dark-lantern candelsticks. Contrivances of many kinds were devised in bygone days for use as candle holders, but perhaps one of the most outstanding was the pocket dark-lantern candelstick. This candelstick was so designed that it was not too heavy to be carried by a lady, and although complicated in its arrangement, when assembled was really compact.

The body of the lamp was of tin, cylinder shaped, five inches long and two in diameter, japanned black and trimmed with gold or yellow striping. A slightly rounded cover formed a hinge on top, on the inside of which appeared a double swinging bow. Two folding wire handles were placed at the back and on the inside a piece of oval tin with highly polished surfaces served to deflect the candle light.

An opening three inches long and covered by a remarkable shade of tin working on a hinge at the top allowed the light to shine forth or not, at will.

Inside, holes were punched in diamond-shaped groups, for ventilation.

An automobile manufacturing plant has been started in Bombay, India.

The smaller the fish the more it strains the veracity of the angler.

Our Oriental Problem

What Can Be Done With Canadian Born Japs and Chinese

Our Oriental problem is primarily no longer one of exclusion on the frontier. It is becoming increasingly a problem of our own people, of Chinese and Japanese born in Canada, educated in Canadian public and high schools, and in everything but descent, more Canadian than Oriental. What are we going to do with these young people? There were practically five thousand of them in the schools of British Columbia last year. There are probably as many this year, or more. In Richmond, 900, out of 1,500 pupils are Japanese, and in two or three of the Vancouver schools there is quite a sprinkling of Japanese and Chinese—bright youngsters, eager, industrious, energetic.

It is suggested, from time to time, by anti-Oriental organizations that the Orientals of British Columbia be bought out and sent back to the country from which they came. This plan, of course, is impracticable. But even if it were practicable, it would not solve the problem of the second and third generation Chinese and Japanese. These didn't come from anywhere abroad; they were born here. In our schools we have imported Canadian ideals upon them. All their associations and interests are here. In many cases they have no more relations with Japan or China than a second or third generation Canadian has with England or Scotland. To some extent, at least, they have adopted the Canadian standard of living. We have put these young people into our melting pot. We have done what we could to make them Canadians. Yet we refuse to accept them as Canadians.

What are we going to do about them? One of these days they will be growing up and will want to know.

Placing the Blame

Modern Drug Store Evolved From Postage Stamp, Says Doctor

The drug store of the old days was a place where you could buy drugs and little else. Today it is a place where you can buy anything from fishing tackle to phonograph records. How did it happen?

Dr. Logan Clendenning, writing in the American Druggist, believes that the humble postage stamp is to blame.

The public had a way of wanting postage stamps at very old hours; and it began to displease the drug store was apt to be the only place open. The druggist was forced to carry stamps. This got both druggist and customer used to looking on the drug store as a convenient place for emergency purchases; and the druggist gradually began to stock up with other things that people might want.

Out of it grew the drug store of today, an institution whose usefulness is measured by the fact that it sells fewer drugs than useful things that people need more.—Vancouver Sun.

Average Value Of Farm Lands

The average value of farm lands as a whole in Canada, improved and unimproved, and including buildings, is stated for the year 1929 to have been \$37 an acre, in a report issued by the Canadian Bureau of Statistics.

To Save Eyesight

Established In Canada

Preventive work in matter of saving eyesight of Canada's people has recently taken another step forward. New Brunswick is now carrying on a survey of the eyesight conditions of the school children of that province preparatory to organizing, if need appears, sight saving classes in certain schools. Miss Mary McLellan, M.A. (Oxon), who has recently returned from a lecture tour in the Maritime provinces in connection with the preventive work of the Canadian National Institute for the Blind, outlined the enthusiasm by which the work is being received by medical and educational authorities.

New Brunswick has the distinction of having monthly health examination of all school children, not only in the cities but throughout the province, Miss McLellan pointed out.

It is estimated that one in every 500 school children in Canada have defective sight, usually less than one-third normal. Already there are ten sight-saving classes in Canada, four of which are in Toronto, one in Vancouver, two in Winnipeg, one in London, one in Hamilton, and one in Halifax. The success of the Toronto classes has demonstrated that children who would otherwise lose confidence by inability to keep up with other pupils regain their morale, while their sight is not further impaired by unsuitable study.

Due To Advertising

Orange Growers' Consistent Campaign Has Proved Worth While

It is not particularly gratifying to Canadians to be told so often, on good authority, that more oranges are eaten in Canada than apples. When an explanation is asked for this state of affairs, it is said that it is largely due to the persistent campaign that has been carried on by the orange growers of California. The astounding statement is made in a recent report of E. G. Dezell, the general manager of the California Fruit Growers' Exchange, that by spending \$1,680,000 in the advertising and merchandising of sundried products last season, the exchange obtained \$118,875,102 for a crop of oranges, lemons and grapefruit, so large that it would have brought disaster to the growers a few years ago. The demand was created by advertising, and then good salesmanship did the rest.—Brantford Examiner.

World Label Butler

Regulations requiring packages containing butter to be marked with the name of the country in which the butter was made are being considered by the Dominion Government. Hon. Charles Stewart, acting minister of agriculture, so informed the House of Commons in reply to a question from H. B. Adhesed (Labor, Calgary East.)

British Drink Most Tea

The British breakfast table accounts for the great bulk of the world's tea consumption, last year's importation figures show that, aside from tea-drinking in the countries of production, Great Britain alone consumed 62 per cent. of the world's supplies, and the British Empire as a whole 70 per cent.

Where the Horse Is Missed

Millions Have Disappeared From U.S. City Streets Is Estimate

The recent (United States) Government figures showing a disappearance from farms of 714,000 horses and mules during the past year illustrates a long-time trend which undoubtedly has had an important bearing on the surplus crop problem and low price of the past decade. Back in 1919 the work stock carried on farms amounted to 28,436,000 horses and mules. The January, 1930, estimates places the number at only 18,782,000. This disappearance of 7,654,000 head of work stock from farms has been accompanied by a valuation decrease of approximately one and a half billion dollars.

There are no accurate figures concerning the disappearance of horses and mules from cities and towns during this period, but that the reduction has been far more sweeping and rapid than in rural districts should be apparent to anyone who recalls conditions a decade ago. Some estimates have placed this loss of work stock from city streets during the past ten years at two and a half million head, thus pushing up the grand total disappearance of horses and mules during the past decade to the ten-million head mark. Ten million head of work stock would consume between fifteen and twenty million tons of hay and approximately three-quarters of a billion bushels of grain. Agriculture has therefore lost—and the oil industry has captured—a market demand which, were it now available, would undoubtedly send farm prices soaring.—The Country Gentleman.

From a Different Angle

Fruit When Reckoned By Weight Is Not So Expensive

Very often the housewife will get a bad estimate of the actual cost of a certain food, by figuring it in some other form. For instance, oranges at sixty cents a dozen may seem very high, but if you weigh a dozen and find they are costing about fifteen cents a pound, they appear very low priced indeed—particularly when you consider that you are paying several times this much per pound for such foods as butter, steak and cheese. As most of us eat too much of the acid-producing foods like meat, fish, bread and eggs, and not enough of the alkaline foods like oranges, apples, cabbage, carrots, celery and spinach, it is well to know this little trick of figuring price. The money saved by getting four pounds of steak instead of six will go a long way toward taking care of fruit cups, salads and light desserts for day, and a little careful figuring will enable any woman to set a more evenly-balanced table than she does, at even less than she is spending for food today.

Phone System For Ships

A telephone system, which in addition to the usual inter-communication system found on ships for use of the personnel, connects all first class cabins, is one of the features of the installation on the three new steamships, "The Prince Henry," "Prince David," and "Prince Robert," which are being placed in service on the Pacific coast by the Canadian National Steamships.

To most of us Easy Street seems to be marked "No Throughfare."

New Art Of Diamond Cutting

Work Has Been Speeded Up By Ingenious Mechanism

For centuries the art of the diamond cutter was considered a special talent which must be developed by years of training. Today, diamonds are cut with the aid of ingenious mechanism which has greatly speeded up the work, while producing the most brilliant gems in history. The machinery which is revolutionizing the ancient art is for the most part the creation of American ingenuity.

It no longer requires a diamond to cut a diamond. Formerly there was no way of dividing a diamond except by splitting it along the line of cleavage. Diamonds are now sawed into pieces at any desired angle. The hardest of stones are sawed by means of a very thin disk of phosphor-bronze, revolving at a very high speed. It takes a day to cut through a single carat. One worker directs a dozen such saws. It is very delicate work for a stone may be shattered and ruined if the man strikes a flaw in the gem. The danger is anticipated by listening intently to the humming note of the saw, which sounds a signal of danger when a flaw is approached.

No longer are now reduced in size by turning them in a lathe like a piece of wood. The tool used in turning is tipped with a diamond. In this way skillful workmen can reduce the size of stones quickly and accurately, saving the slow and laborious work of splitting and polishing followed by the past. Incidentally, the by-product or "waste" in the form of diamond chips and dust is very carefully collected.

One of the most important labor-saving devices used in diamond-cutting is the mechanism which determines the angles of the facets of the gem. The diamond cutter of the past cut the facets by slowly rubbing two diamonds together. Later the work was done by holding the stone against a rapidly revolving disk. The angle of the facet was determined by the judgment of the diamond cutter who became expert from long experience. The new tool is equipped with a dial which makes it possible to cut the facet with scientific accuracy. The diamonds cut by the new methods reveal all the latent beauties of the stone and are, doubtless, the most beautiful ever cut in the long history of the art.

From the Inside

People In Broadcasting Stations See Strange Things

Karl K. Kitchen, writing in New York Sun, says: "A friend of mine was being shown through one of the larger broadcasting studios. As he watched an orchestra preparing for its program he stood with his back to one of the announcer's desks, and at the same time overheard him telling his audience:

"... when the gong strikes it will be exactly 5 o'clock Eastern Standard time . . . this correct time comes to you through the courtesy of the Black Clock Company."

My friend turned to see the announcer as he struck the gong and he almost swallowed his tongue when he saw that the timepiece from which that personage was waiting to gauge the gong strike was one of the well-known dollar variety."

A Topographical Error

In an announcement of the revival at the Church of the Brethren, held in the Kansas Herald, the linotype spoiled a perfectly good compliment by misplacing one letter. The sentence should have read: "He believes in a happy religion and lives it." But the linotype made it, "He believes an a happy religion and lives it." Can an apology ever fix it?

Housewives of New Zealand are using American vacuum cleaners.

A single palm tree has produced as many as 4,000 dates.

"You don't recognize me? What about the debt you owe me?"
"Er—I don't recognize the debt either."—Buen Humor, Madrid.

VISIT CANADIAN UNIVERSITIES

A greater mutual understanding of educational facilities in Great Britain and Canada will result from the visit to this country of 16 headmasters of English Public Schools. They crossed the Atlantic on the Canadian Pacific liner "Duchess of Bedford" and will visit the leading Canadian Universities. The picture shows them on board the ship on arrival. They are from left to right, sitting: W. H. Fyfe, M.A., Christ's Hospital; F. H. Mallin, M.A., Wellington; Dr. G. Norwood, Harrow; F. Fletcher, M.A., Charterhouse; J. Talbot, T.D., M.A., Haileybury. Standing: Kenneth Lindsay, M.A., Oxon, and H. H. Hemming, M.C., McGill, hon. secretaries of the party; A. B. Backett, M.A., Kingswood; J. Bell, M.A., St. Paul's; S. R. Gurney, M.C., M.A., Whitgift Grammar School; G. Turner, M.C., M.A., Marlborough; Rev. V. P. Nevill, O.B.E., M.A., Ampleforth; G. W. Olive, M.A., Dauntsey; M. L. Jacka, M.A., Mill Hill; G. Robertson, M.A., George Watson's College, Edinburgh, representing Scottish Schools; H. Grose-Hodge, M.A., Bedford; W. M. Gordon, Wreckia College, Salop; D. L. Miller, Manchester Grammar School.

Red Rose Orange Pekoe Tea is truly economical. A half pound makes almost as many cups as a full pound of cheap tea costing 50c to 60c.

CHAPTER IX.—Continued.

"Not one cent under a dollar seventy-five, Edgar Purdie, and then I'm giving them away. But you needn't feel at all obliged to take them. That Darling girl will most the city and knows a bargain when likely snap 'em up. She comes from the sea one. Maybe you'd better be getting on. It's quite a ride to South Wickfield, and you've got to go back home for whatever it is you're going to."

"Whoever said I was going to South Wickfield?" burst from the embarrassed deacon. He was almost as red as his new tie. "Look here, Grandma Davis, don't you put those heads away. This is a—a sort of an emergency. Will you take one-fifty, just for the sake of auld lang syne?"

"Well," sighed Grandma, "seeing that you're an old friend, Edgar, and as you said, this is a—a particular occasion, I'll let you have 'em. But you'll have to pay me cash. Giving 'em away like this I—"

"Oh, I'll pay cash!" broke in the deacon eagerly. He pulled out a wallet, deposited the amount in Grandma's hand and put the coveted possession into his pocket, buttoning his coat above it for extra safety. "Good-by, Grandma. Seems to me you've done an awful hard bargain, but there's times when it pays to splurge a little. You sure these beads are stylish?" he added, pausing; and at the old lady's vigorous affirmative he closed the door.

"It was all well, perhaps, that he did not stay longer, for no sooner was he safely off than Charman and the doctor burst from their retreat in the next room."

"Your granddaughter seems to be in a state verging on collapse," he announced John Carter. "I had hard work to restrain her from spilling that shrewd transaction that you have just terminated so successfully. Believe me, Grandma Davis, you would have shone as a horse trader!"

The old lady chuckled, and commented, as Charman sank limply in the chair recently occupied by her victim.

"I do know when I've had such a good time, I wish now that I'd asked more, and made him come up on his offer slow and painful. When I remember—"

"But, Grandma," interrupted Charman sternly, though the corners of her mouth twitched upward, "you said you'd ask a dollar, and you asked two!"

"I said I'd make him pay a dollar," corrected Grandma. "Do you suppose, child, if I'd said a dollar in the first place that he'd have given it? I do. That's why I asked for cash. If Luella refuses him this afternoon we'd have had those beads back on our hands come night, or my name's not Davis. You can't tell me any—"

When Baby Comes

If you cannot nurse him turn to Eagle Brand, the leading infant food since 1887.

FREE Baby Food—only The Eagle Brand.

EAGLE BRAND CONDENSED MILK

W. N. U. 1834

thing about Ed. Purdie, I went to school with him."

"What shall you do with your illegitimate gains?" queried the doctor, his eyes twinkling.

Grandma looked thoughtfully from the window as she replied: "I suppose I ought to put it in the foreign mission box; but I guess I'll do full as much good helping to pay the milk man. Here, Charman, you better take it. It's not every day that we make a dollar and a half so easily."

"We might spend it on a wedding gift for the deacon!" suggested Charman, as she arose and took the profits of the nefarious transaction from Grandma's hand.

"Indeed, we shan't!" snapped the old lady quickly. "I gave him the present when he married his first wife, Emma Dodd, as good a woman as ever drew breath 'o' life. It was a silver sugar spoon, and came from Portugal. It was real good pleased with it; but six months later Edgar made her shine it up and give it to his second cousin, Etta Stone, who was getting married over at Templeton. Lizzie Baker was at the wedding and saw it with her own eyes. It was the last wedding present I ever gave to Edgar Purdie, though dear knows I had chances enough as the years passed. Well! Well! We little thought when you asked Jim Bennett to get those beads, you did man, what a good investment we were making."

"A marvelous investment, considering the fact that Jim paid for the beads himself!" laughed Charman. "I'm going to ride with him this evening. Grandma, and shall entertain him with an account of your trip into high finance."

"You better make him promise not to tell," warned the old lady. "If Sarah Bennett got hold of it, the whole thing would be town talk by night, and like as not the deacon would sue me for damages—that is, if he could get Gam Garfield to take the case!"

"Here comes Edward Howe," she added, with a glance from the window. "He's stopped, and is staring at your new office, sonny. You might run out and see if he wants you to help cut off a leg or something. And see here! You ask him to step in a minute if he's got time. I want to tell him how I got the better of Edgar Purdie!"

CHAPTER X.

Two weeks had passed, busy weeks for Charman, and not devoid of interest. With housewife's instinct she had revealed in putting the finishing touches to the deacon's offer. He heartily approved of the rug for the windows; and a letter to his sister in Boston had been fruitful of results in the shape of a rug that brought an exclamation of rapture from the girl when she first saw it.

"Are you a millionaire?" she gasped when she could find her voice.

He laughed.

"Far from it! But neither am I the world's worst spendthrift, as you might think. This happens to be one of the treasures that fell to my lot when my mother died, and the old home was broken up. It's a Bokhara, and blanda with those hangings as if it were made for them, doesn't it? And behold, fair lady, my sister's donation to my new quarters! Aren't they stunning?"

He held aloft a pair of beautiful brass candlesticks, while Charman exclaimed again. They were in the office, the door wide open to let in the summer sunshine which fell across the shining brass as the girl reached for the treasures, and set them on either end of the old mantel.

"I feel that Aladdin himself must be occupying the room where Grandma once kept her 'bird's nest,'" she remarked whimsically. "All you do is to drop a letter in the Wickfield post office, and lo! rare tapestries and antique brass descend upon us! Have your wishes always been granted with so little effort?"

To her surprise the doctor took her question seriously. He was looking down at the rug; and when he raised his eyes she saw that her careless words had struck some chord that hurt him.

"Up to a certain age, I suppose they were," he replied thoughtfully, "and yet, the possession of this rug, for instance, is not without a twinge of heartache. It means—my having it all—that I no longer have my parents—that never again shall I see it in its accustomed place in the big living room at home! It brings up memories that hurt you see, even though I love them."

"But it is wonderful to have those memories," she said, laying an impulsive hand on his.

He squeezed her hand, and responded cheerfully. "Of course it is! But the first glimpse of that old rug brought everything back, and gave me a silly lump in the throat for just a minute. Really, it looks like sitting to end the candlesticks. Does the place suit you, Mistress Charman?"

"Isn't it more to the point to ask if it suits you?" laughed the girl as she wiped some dust from the old mantel.

"You know without the asking, I'm perfect; and, thanks to your feminine touch, even the waiting room looks livable."

"Those thanks are really due to the wicker chairs you sent for," she corrected. "Yes, I'm satisfied. It looks—Why, here's the doctor!" she broke off suddenly. "Come in, Doctor Howe, and pass judgment on the finished product of our labor."

The old man stepped inside, looking about with shrewd, appraising eyes.

"Not much like my first office," he commented. "It was a room over the old drug store, but as business in summer, and proportionately cold when the snow fell. You're a lucky man, John Carter, with a place like this, and Charman Davis to look after you."

"I realize that," responded the young M.D., with a glance at Charman that brought new color to her cheeks. "At least, I shall have a pleasant place to cool my heels in while waiting for the trusting public to employ me. Do you want my company this morning, sir?"

"That's why I stopped. I need your enthusiasm to throw light on a case that's been bothering me two weeks. Want to go with Charman? It's a beautiful morning for a ride."

The girl looked longingly through the open doorway, but answered: "I couldn't, really. I've a thousand and one things to do this morning. What time shall you be back? If a patient appears in your absence, Doctor Carter, I'll keep him here until I have to sit on him!"

"We'll be back at noontime," chuckled the old doctor; and as they started John Carter turned to wave farewell to the girl who stood in the doorway of his new office.

Charman waited there until the shabby car vanished down the dimly shaded street, then turned back to the Oriental rug with eyes that drank thirstily of its beauty.

(To Be Continued)

Strangled With Asthma is the only expression that seems to convey what is endured from an attack of this trouble. The relief from Dr. D. Kellogg's Asthma Remedy is beyond measure. Where all was suffering there comes comfort and rest. Breathing becomes normal and the bronchial tubes completely cleared. This unequalled remedy is worth many times its price to all who use it.

New Land Map

The Department of the Interior has issued a new edition of a land map which shows at a glance the number of quarter sections of Crown land still available in each township. The map also indicates Dominion Land Offices, existing railway facilities in each district and provides the customary information regarding cities, towns and villages.

Hibernation is as common among spiders as among bears.

YOUNG WIFE STRENGTHENED

After Taking Lydia E. Pinkham's Vegetable Compound

Bancroft, Ontario—"When I first took Lydia E. Pinkham's Vegetable Compound I had been married about a year and my strength was leaving me on account of my condition. I was only 19 and it was my first child. My mother told me I needed something to steady my nerves and a girl friend told me to take the Vegetable Compound. I am so thankful I did because it strengthened my whole system and now I feel perfectly well and have a sweet little baby."

—Mrs. J. B. STALKER, Bancroft, Ontario.

Paintings Are Carefully Kept

Canadian War Memorial Pictures In Fire Proof Room at Ottawa.

When construction of a new national gallery building is undertaken, provision will be made for the proper housing and display of the Canadian war memorial pictures. This was the opinion given by Hon. J. C. Elliott, K.C., Minister of Public Works, in the House of Commons to a question raised by Col. Thomas Cantley. The Canadian national war memorial pictures, except those which now hang on the walls of the Senate chamber, are stored in a fire-proof storage room, specially prepared under the supervision of the National Gallery officials, in the Auditorium Building in Ottawa.

The pictures, said Mr. Elliott's answer, are completely protected from any damage due to dampness or any other unfavorable atmospheric conditions. They are not, at present on view, but can be examined by special arrangement.

The pictures referred to have an estimated value of over \$1,000,000. They were acquired by Lord Beaverbrook's committee during the war and presented by that body to the Canadian people. They are paintings, etchings and pastels of every phase of Canadian war effort, undertaken by many of the most outstanding contemporary artists. For the past few years this collection has been stored from view due to lack of suitable accommodation.

KEEP THEM HAPPY BY KEEPING THEM WELL

It is natural for children to be happy, active and full of fun. When they are fretful, fussy and disinclined to play you may be sure that they are suffering from indigestion. Baby's Own Tablets will take care of this.

Almost invariably that something lies in the digestive tract. The need for an absolutely safe corrective of childhood ailments that Baby's Own Tablets have been designed by that body to regulate the stomach and bowels and thus drive out constipation and indigestion. Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Was Money In Pocket

How Ike Turned Bad Investment Into Paying Proposition

Abe owned a well known race horse, for which Ike offered him \$10,000. Abe accepted the offer and a cheque, promising to send the horse next day.

Overnight, however, the horse died. But Abe could not bear to lose his bargain, so he cashed the cheque and sent the horse on.

He heard nothing further, and did his best to avoid Ike. Unfortunately the day came when they met face to face. Abe took the bull by the horns and asked Ike what had become of the horse.

"Well," said Ike, "even I found it was dead, seeing that everyone knew a wonderful horse it was. I raffled it and, twenty-five people bought tickets at \$500 each."

"But," said Abe, "didn't anyone grumble?"

"Only the man who won it," replied Ike, "so I gave him his money back."

Gardening For the Blind

The British Guild of Blind Gardeners urges gardening instruction for all sightless children. Blind gardeners can prune fruit trees, sow seeds and thin out vegetables.

The Manitoba hydro electric power development program for 1930 calls for an expenditure of \$2,000,000 on extending transmission lines into rural areas.

Douglas' Egyptian Liniment is without a rival. Stops bleeding instantly. Cures wounds and prevents blood poisoning.

Mrs. Williams—"Oh, Jane, however did you go and break the vase?" Jane—"I'm sorry ma'am. I was accidentally doing it."

Minard's is Best for Grippe.

Future Of Television

Great Possibilities Are Foreseen By Earl Of Clarendon

The Earl of Clarendon, former chairman of the British Broadcasting Corporation, foresees "staggering possibilities" for television.

He says: "When it is possible to present a stage play or a national event such as the Derby on a small screen which a family or perhaps a small audience in a hall can see, then television will go like wildfire."

While we have some distance to travel before that goal can be achieved enough progress has been made to suggest that it may be attained within the next few years.

Little Helps For This Week

"God is our refuge and strength, a very present help in trouble."—Psalm xiv. 1.

Console thyself with His word of grace.

And cease thy wall of woe; For His mercy never an open foe.

And His love no bounds can know; Lean close unto Him in faith and hope.

How many like thee have found In Him a shelter and home of peace. By His mercy compassed round!

—John Greenleaf Whittier.

Where but in These have we a covert from storm, or shadow from the heat of life? In our manifold temptations Thou alone knowest and art ever near; in sorrow Thy pity relieves the fainting soul; in our prosperity and ease it is Thy Spirit only that can wean us from pride and keep us low.—James Manteau.

Minard's Will Stop That Toothache.

Will Be Paying Guest

Grat Zepplini To Pay For Visit Of Lakehurst Naval Base

The Graf Zepplini hereafter will be a paying guest when it visits the United States. During its forthcoming stay the German ship will be quartered at a rate of \$2,000 a day in the big "hotel" at Lakehurst, N.J., naval base.

Other items on the bill include: \$2,000 for preparing the base, \$1,000 a day for keeping the base in readiness, dating from the hour of the expected arrival, and \$50,000 insurance. A deposit of \$15,000 covering all charges, will be exacted. It will be the first time the government has ever levied a bill against any foreign aircraft for accommodation at a U.S. naval base.

Judge—"You admit smacking the chair on your husband's head."

Accused—"It was not my intention!"

J.—"You did not want to strike your husband?"

A.—"Yes—but I did not want to break the chair!"

Treat Colds 2 Ways With One Treatment

RUBBED ON throat and chest, Vicks does two things at once:

(1) It is vaporized by the body heat and inhaled direct to the inflamed air passages, and

(2) It stimulates the skin like an old-fashioned poultice and "draws out" the soreness.

Speakers See Each Other Through Device On Telephone

The curtain pulling the telephone of the future was jerked aside in the first practical demonstration of a two-way television by the American Telephone and Telegraph Company.

Users of the device, described as the "isomophone," looked each other directly in the eye as they conversed, two and one-half miles apart.

It was a demonstration of the progress in approaching the day when it is hoped to be able to see the person at the other end of the telephone lines.

Minister, Run-Down In Health, Gains 7 lbs. in 3 Weeks

Rev. W. J. Taylor writes: "After a 7 weeks' revival campaign I was entirely run-down and losing flesh rapidly. I decided to give Ironized Young's Food a trial. After 3 weeks I found my strength returning and the tired feeling gone. In 3 weeks I had gained 7 lbs. and was myself again."

Imagine just 3 weeks to change from a "skinny" tired person to a strong, well-filled-out man or woman. Ugly hollow cheeks. Broomstick limbs become round and chubby. Tired feeling disappears. Blemishes and skin eruptions vanish.

Only when yeast is Ironized is it more effective—for Iron is needed to bring out the weight-building and strengthening values of Yeast. Pleasant-tasting tablets. Safe for everybody. Never cause gas or bloating, no harmful drugs.

Go to any drugstore today and get a full size treatment of Ironized Yeast. If after this generous trial you are not delighted, your money back instantly from manufacturer.

4 "HEALTH WARE" Utensils you Should Have in Your Kitchen!

Why not replace those old, battered pots and pans with McClary Enamelled Ware . . . the Modern Durable Kitchenware.

Say you start your set with these four pieces: Kettle, Sauce Pan, Double Boiler, Covered Roaster.

By and by you will have a complete set. Your day will be so much brighter and happier!

McClary Enamelled Ware Kettles, 80c to \$4.00.

McClary Enamelled Ware Sauce Pans, 30c to \$1.50.

McClary Enamelled Ware Double Boilers, 95c to \$4.00.

McClary Enamelled Ware Covered Roasters, \$1.00 to \$4.00.

McClary Enamelled Ware Utensils. Modishly shaped. Nicely balanced. Built to last. All sizes.

McClary Enamelled Sauce Pans. A durable surface of pure porcelain enamel. A hint of the toughest steel. In all sizes.

McClary Enamelled Double Boilers. For every purpose. A most useful utensil. Easy to clean. Use only soap and water.

McClary Enamelled Covered Roasters. Saves money every day it is used. Saves time, space and worry. As well. Several sizes from which to choose.

McClary Enamelled Ware. A Health Product of GENERAL STEEL WARES LIMITED. Branches Across Canada.

fellows Lodge at Didbury on
Thursday night.

Wm Pogno has been putting his
billiard and pool tables in first class
shape during the past week, and
has also had the interior of the bar-
ber shop painted. That paint-up
and clean-up spirit seems to be in
the air.

Rumors around town are that
the contract for the C.P.R. branch
line to be built out of Crossfield
this year has been awarded to a
Winnipeg firm.

OBITUARY

Word has just been received of
the death of Mrs. Fred R. Robin-
son at Port Haney, B. C. on Sun-
day, April 20th. Mrs. Robinson
was 85 years of age and an old-
time resident of the Crossfield and
Carstairs districts. Coming here
with her husband and family in 1902,
he moved to Port Haney in 1920,
where Mr. Robinson passed away
in 1923.

Mrs. Robinson is survived by her
two daughters, Daisy of Port Haney,
Mrs. Hays of Olds and two sons,
Ted of Port Albernie and Harold
of Carstairs.

O'Neil News

The usual 500 club and dance
was held in the O'Neil school house
on Wednesday 16th April, and
had for its host Harry Porter. In
spite of the fact that spring opera-
tions were commencing there was
a large crowd in attendance. This
game completed the series that
had been running for the past
two months. Mrs. Fred Adams
and Mr. Harry Porter both carried
off the final as well as the even-
ing prize. Mr. Chas. Fox won
both the consolation for the gen-
tles, while Jean O'Neil and
Peggy Grainger took the final and
evening cons. respectively.

Miss Ina Fraser, local teacher,
spent her Easter holidays visiting
her sister Alma, who is in training
in the Royal Alexandra Hospital
at Edmonton.

Miss Peggy Grainger, from Cal-
gary Normal school spent four
days practice teaching in the
O'Neil school, under Miss Fraser's
supervision.

Captain and Mrs. Wigle are
both progressing favorably under
the hands of a trained nurse with
Dr. Whillians in attendance. Mrs.
Wigle having a bad attack of
pleurisy and severe cold which
threatened pneumonia, Captain,
the flu and an infected hand.

Mrs. Tennant of Calgary is
visiting her daughters, Mrs. W.
Landymore and Mrs. Earl Ad-
ams.

UNITED CHURCH

At the Easter Service in the
United Church, Mr. Gibson sang
"It Is Jesus" and Mrs. Young sang
"Open the Gates of the Temple."
The choir rendered the Anthem,
"What are These."

Next Sunday evening the choir
will sing Stainer's Anthem, "Hark,
Hark My Soul." Mr. Waldoock
will sing a solo.

At the close of the service the
Sacrament of the Lord's Supper
will be observed.

There will be a meeting for Bible
study and prayer at 11 a.m. in the
church.

I Saw :-

Frank Brown of Sampson, hit-
ting for home on Sunday. Frank
had his new Ford hitting about 50
per when we seen him last.

Ed. Meyers trying to convince
Hughie McIntyre that he should
give at least five more iron men to
the play ground fund.

Mr. E. S. McRory of Calgary,
shaking hands with many old friends
here on Monday night.

Police Magistrate Lewis when
he gave young MacDonald a good
stiff lecture on the folly of stealing,
which actually brought the tears to
the prisoners eyes.

Happy McMillan on his way
home with a dollar's worth of seeds.
In planting seeds we once again re-
member a story told by the late Bob
Edwards of a Chinaman who planted
some seeds and was disappointed.
If you do not remember this story
which appeared in the Eye Opener
some years ago, ask your wife.

"I saw more drunken women in
seven months in the United States
than I have seen in England in
seven years"—St. John Ervine.
